

"I am wanting the Ridgemont Team to know what an outstanding job that NOW Specialties Inc has done for me and this project. From the Project Management team, the General Superintendents team, and down to the field tech/staff. NOW came to the Granite Place project right off under the gun and started their work much later than what I was comfortable with only because of changes in the design and the project itself being ready for them in the fashion for them to work affectively. In knowing this, several coordination meetings took place after approval of the changes and material procured to accelerate NOW work load.

"Knowing all the challenges ahead, I was concerned on the time line for NOW to get finished up. I was told several times by the NOW PM that they will get it done and I will be happy. Well Team, I'm here to say that my experience with NOW not only has been very good, but I'm happy. Let me tell you why.

"Now has done an amazing job on pre-planning, coordinating with Ridgemont, when there were problems they always came to me with solutions and helped me out at every turn. Not only has NOW Specialties been with me for the last two months every weekend (Saturdays and Sundays) and did not even have a complaint or a peep from them but NOW Specialties has done everything they said they would do and more. Fellas, it should go without saying that I highly recommend NOW Specialties for all of our jobs. From the field side, NOW Specialties Inc is a breath of fresh air from a Superintendents perspective.

"PS- call me if you need to know further details. See pic's, 3 crews today, working on a Sunday to meet my deadline put in front of them".
